

REQUIREMENTS

FUNCTIONAL REQUIREMENTS (REQUIRED):

- Be able to load webpage
- Task list appears on webpage and is stored in database, so when the app is opened/closed, the tasks should remain on the list.
- Add tasks to the list by accepting user input and the user clicks "add task". This should add to both the task list on the app and to the database.
- Delete tasks from the list by clicking "delete" next to a task. Updates on both app and database.

FUNCTIONAL REQUIREMENTS (DESIRED):

- Blank tasks should not be accepted.
- Undo a deletion of a task (not implemented)
- Multiple users (not implemented)

NON-FUNCTIONAL REQUIREMENTS:

- Button to add tasks
- Link next to each task to delete task
